Chris Fei
Hiring Manager
mParticle

Dear Chris Fei,

I am very exited to apply for the Staff Software Engineer position at mParticle. I was refereed to this opportunity by Gabriel Tirbúrcio, who is a Team Lead. They shared their positive experience working at mParticle, and I am eager to bring my skills to your team as a passionate developer whom believe in the power of programming and logic to solve problems.

Over the past 6 years, I had developed solid skills in developing and maintaining mobile and web applications, primarily with the React framework, which I have been working with for over 5 years. I started as a fullstack developer, but I have recently been focusing on my frontend skills recently. My experience includes working on a variety of projects such as e-commerce applications, ERP systems, personal resources managing applications, services integrations, GraphQL and RESTful APIs and SQL database management, using agile development methodologies such as Kanban and Scrum depending on the team`s workflow. Additionally, I have experience in direct client interaction, managing and interpreting tasks assigned to me and actively collaborating with the teams to deliver high-quality solutions.

I look forward to talk about this carrer opportunity as I am looking to further develop my skills and advance professionally, enabling me to plan both my personal and professional life with greater enthusiasm and freedom. Thank you for considering my application, and I am available to further discuss how my experience can benefit your team.

Sincerely,

Luciano Rodrigues
